University of Guelph – *Guelph, ON*

September 2014 – April 2019

WORK EXPERIENCE

Tempus Electric Bikes

Guelph, ON

Contractor & Technical Advisor

January 2017 – April 2019

- Worked closely with the founder to create and maintain the website, as well as advise him on technical aspects of the electric bike (both software and hardware/electronics).
- Experimented with visual recognition sensors for assisted steering and speed control.
- Gained experience with display and motor control programming with C and Python.

University of Guelph

Guelph, ON

Undergraduate Research Assistant

May 2016 – August 2016

- Solely responsible for the development of a data analytics program used to estimate the size of classes in future years based on previous data and other factors.
- Application was developed using Python, utilizing a relational database via MySQL.
- Documented code and created guides to explain the program's functionality.
- Communicated and worked closely with the School of Computer Science faculty and staff during the development process to ensure their needs are being met and that any issues are effectively resolved.

PROJECTS

Discord Bot

March 2019 – Present

- Created a cross-platform bot for the VoIP program Discord in Python that allows for easy activation of administrative commands and simple audio clip creation and macroing.
- In the process of re-writing the program in JavaScript using Electron and React.js to create an attractive user interface that is simple to use for all users.
